

One of the things I am doing to eliminate the growing intrusion on my life by you fine folks in the government, I began subscribing to xm satellite radio. As an adult who is able to make decisions for myself about what I want to listen to in my own car, without government intervention, I am concerned about any plans you may have to begin regulating what is broadcast over the air in regards to information like traffic and weather.

What do you care what a private company does? Why is it even an issue. You should be working to do the following:

1. Lower, if not end, taxes.
2. Get the United States out of any wars on foreign soil
3. end the insane war on drugs.

leave the radio that i pay for off your agenda.

thanks!
